Abbreviations: CBD: Cannabidiol; SAS: Special access scheme; THC:Tetrahydrocannabinol; TGA: Therapeutic Goods Administration; WF: Whole flower.

Dosing and Administration⁸

Because of the variable nature of vaporisation as a route of administration – dosage and titration schedules should be highly individualised to each patient. Gradual titration and ongoing assessments are recommended to evaluate individual response.

Tilray® recommend their Whole Flower Dried Cannabis products be administered with an approved medicinal cannabis vaporiser.
